Trusted Partner for your Digital Journey

We are leader in Digital Transformation

We are a leader in digital transformation serving a global client base.

In this fast-changing world, driven increasingly by data, Atos brings together people, business and technology to create the firms of the future.

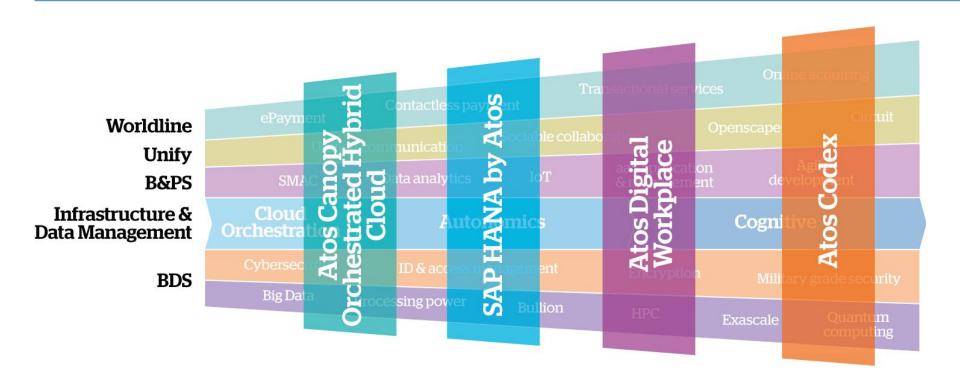

We are the Worldwide Information Technology Partner for the Olympic & Paralympic Games.

Atos is a Societas europaea (SE) company and we are listed on the Euronext Paris market.

We operate under the main brands Atos, Atos Consulting, Atos Worldgrid, Bull, Canopy, Unify and Worldline.

2019 Ambition: a Digital Transformation Factory adapted to your transformation needs

Vision

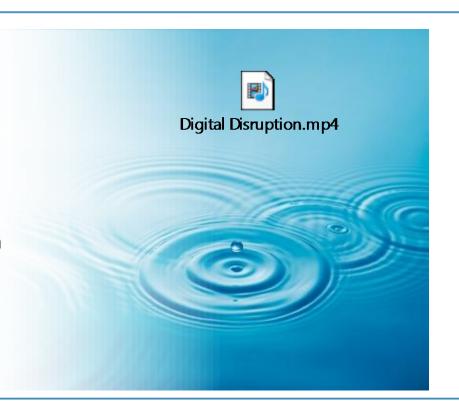

Digital Disruption

Digital Shockwaves in Business will deeply affect end-to-end production and service processes in all sectors of the economy.

The Digital Shockwaves will interact and interfere:

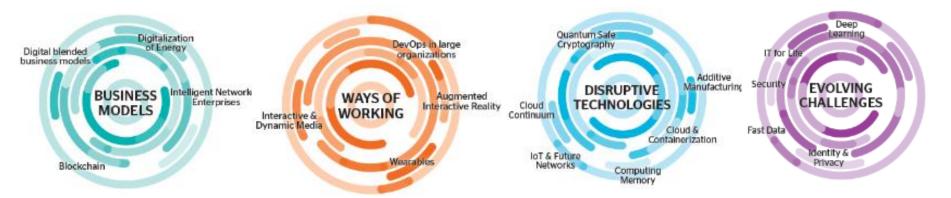

Sometimes **reinforcing** their impact and sometimes **cancelling** each other out. Some will impact certain industries more than others. Some will bring **positive effects**, others will bring **potential threats**.

It is essential to **anticipate** and **respond** to their impact in each given business context.

Under Threat: Why Your Organization is at risk

When it comes to cybersecurity, there are two types of organizations: Those who have suffered a breach, and those who don't know it has happened yet!

► Hacking is no longer the work of bored teenagers working from their bedroom; it is an economy backed by private firms and, in some cases, nation states.

 Cybercrime damage is estimated to cost the world \$6 trillion by 2021

Defending Against Threats

- ▶ Implementing a risk assessment is a must
- Understanding the changes & associated threats that your digital transformation is introducing, is also a must
- Businesses must get ahead of the cybercriminals, being proactive in their defense and building their emergency response capabilities (see <u>EU's GDPR</u> <u>ruling</u>)
- ▶ It is most important that companies understand the depth of the threat they face and take adequate measures

EU's GDPR ruling

Key principles

Although GDPR is still being finalized and thus its final composition is yet to be determined the Regulation is expected to enshrine a number of key principles:

- ► The Right to be Forgotten following a recent court ruling in Spain, this right enshrines the principle of a data subject (typically an individual citizen) has the right to request that personal data held on them inappropriately must be erased.
- Consent it must be made clear whenever an organization wishes to collect and use citizen data, with organizations expected to be able to prove that consumers have opted in.
- Data Portability citizens are expected to gain the right to request a copy of all personal data being processed on them.

Responsibilities

And with these rights come a number of responsibilities for organizations:

- Data Breaches will need to reported to authorities as soon as they are detected;
- A Data Protection Officer will need to be appointed and interface with the national supervising authority;
- ► Failure to comply with the new GDPR could in extreme cases result in a fine of up to 5 per cent of the company's annual worldwide turnover.

Defending Against Threats
